G3-0360 Standard Configuration Shown

Built in response to customer request for an off the shelf controller, the G3-0360 is a durable, lightweight game style grip. Its ergonomic design allows for comfortable extended use and its modularity eliminates the need for tooling charges. The G3-0360 accommodates OTTO's standard HTL and P7 series switches, with your choice of button styles and colors. Ideal for controlling unmanned vehicles, unattended ground sensors and other unmanned applications.
